

March 18, 2020

To our customers and community,

Nothing is more important than the health of our employees, customers and community. We will continue to serve our customers in providing equipment and vehicle rental with the same excellent service you have come to expect. We are open for business and are adapting and implementing measures to help minimize exposure and the impacts of the Coronavirus.

Some of the things that we are doing:

- Provide the ability to rent equipment via digital contracts and credit card taken over the phone.
- Follow your special instructions for delivery and pickup of equipment.
- Observe hygiene and sanitary practices as outlined by the CDC
- Adhere to protocols your organization has requested of us to follow
- Staying home if they are sick or suspect they have been exposed to anyone confirmed as to have contracted COVID-19
- Being flexible to your situation with rented equipment. We understand that protocols are changing quickly and we will continue to work with our customers as we always do. Call us and let us know your situation.

Rent It is a family run organization and has been for 35 years. We understand the uncertainty our customers are going through and we will get through this together.
